Restoration Cleaner

Restoration Cleaner is a gelled, hydrofluoric acid cleaner suitable for cleaning hard to remove dirt from old buildings.

- Quick acting
- Cleans, brick, granite and sandstone
- Free rinsing
- Cuts through all soils
- Will not damage paint and powder coating (will attack nylon)
- Can be diluted

Limitations

- n/a

Specification

Appearance	Clear, thick, liquid
Colour	Red
S.G	1.04 to 1.06
pH	Strong acid
Active ingredient	Hydrofluoric acid

Dilution

For best results use neat. It may be diluted with up to 4 parts of water depending of degree of soiling.

Method

Wet down the surface to be cleaned with water prior to applying product. Then starting at the top, apply the appropriate dilution with a large type soft bristle brush fairly generously or spray, followed by vigorous agitation with either deck scrubbers or stiff hand brick cleaning brushes. The loosened dirt is then simply rinsed away, either with high or low water.

NB All glass and aluminium should be protected from this cleaner as it will etch glass or corrode the aluminium.

WARNING: Product contains hydrofluoric acid . It is essential to read the MSDS before use.

Always test a small inconspicuous area to check for surface compatibility.
