## Multitel MZ250 Truck mounted boom

OneFifty's Multitel MZ250 cherry picker is available on an operated-hire basis (supplied with a professional operator). It is perfect for high-level access applications such as construction, maintenance, installation, renovation, cleaning, pest control, film production and more.

This compact truck-mounted platform has an 'up and over' hydraulic boom which achieves really good outreach even at high levels, allowing you to get to the most awkward, hard-to-reach places. It is also ideal for jobs with restricted or narrow access, as it can fit in a car parking space!

**For more information** on our flexible rental options and very competitive rates please call Andy or Max or email your enquiry and we'll get back to you.
