## Multitel MZ350 truck-mounted platform

An articulated aerial platform, mounted on a 12-tonne truck, the Multitel MZ350 is designed for working at heights of up to 35.5m, with an outreach of up to 20m.

Its compact build, and variable jacking options, make this versatile platform ideal for inner-city projects with tight access and limited parking. It is perfect for high-level access applications such as construction, maintenance, installation, renovation, cleaning, pest control, film production and more.

The MZ350 is available on an operated-hire basis - with a qualified driver/operator - helping you carry out high-level access projects safely and easily.

**For more information** on our flexible rental options and very competitive rates please call Andy or Max or email your enquiry and we'll get back to you.
